

How Useful is the Information Ratio to Evaluate the Performance of Portfolio Managers?

By Christoph Schneider

Grin Verlag Jul 2009, 2009. Taschenbuch. Book Condition: Neu. 217x149x12 mm. This item is printed on demand - Print on Demand Titel. - Master's Thesis from the year 2009 in the subject Business economics - Investment and Finance, grade: A (German Grade: 1,0), European Business School - International University Schloß Reichartshausen Oestrich-Winkel (Union Investment Chair of Asset Management), language: English, abstract: The idea of comparing the performance of different risky investments, for example investment funds, on a quantitative basis dates back to the beginnings of the asset management industry and has been an important field of research in finance since then. Performance measures serve as valuable quantitative evidence for the portfolio manager's performance as well as for the evaluation of investment decisions ex post. Based on the idea of the capital asset pricing model proposed by Treynor (1961), Sharpe (1964), and Lintner (1965), Treynor (1965) developed the first quantitative performance measure intended to rate mutual funds, the Treynor Ratio. Since then, a large number of performance measures with very different characteristics have been developed, for example by Sharpe (1966), Jensen (1968), Treynor & Black (1973), Sortino & Price (1994), and Israelsen (2005). In addition to their power of rating investments...
